POPULATION

Unincorporated villages and hamlets

This list, compiled from records of the 1951 and 1941 Censuses, shows the population totals of the many villages and hamlets across Canada which are not municipally organized and had a population of 50 or more at the 1951 Census. The locations of these places are also indicated.

Population totals are issued in the census reports for the various types of municipal subdivisions in the different provinces such as townships, municipalities, parishes, as well as for all incorporated cities, towns and villages. Separate totals are not shown, however, for unincorporated places since they do not have any official boundaries. It is not always possible to isolate their populations from the remainder of the township, municipality, etc., in which they are situated.

Enumerators are instructed, however, to show separately on their records the households of any unincorporated places which may be located in their enumeration areas. The degree of success obtained in this procedure has varied from area to area. Because of the large number of these places across Canada, very little checking can be carried out in those instances where separate identification of particular villages or hamlets has not been indicated. Because post office addresses are sometimes confused with the address of the actual location of dwellings, it is difficult to determine the exact number of persons to be ascribed to the village or settlement as distinct from the surrounding area.

For such reasons as the above, the population totals shown in the following table should be considered as approximations. Where separate figures are not available in 1941, this fact has been indicated by a footnote to the table. While in the majority of such instances this would probably mean that the particular village or hamlet had a population of less than 50 persons, it cannot be stated with any degree of certainty.

POPULATION

Villages et hameaux non constitués

La présente liste, établie à partir de la documentation des recensements de 1951 et de 1941, donne la population totale des nombreux villages et hameaux au Canada qui ne sont pas organisés en municipalités et qui comptaient lors du recensement de 1951 une population de 50 ou plus. Elle montre également la situation géographique de ces endroits.

Les chiffres de la population paraissent dans les rapports de recensement relativement aux divers genres de subdivisions municipales dans chaque province, tels que les townships ou cantons, les municipalités, les paroisses, de même que toutes les villes et tous les villages non constitués. Toutefois, des chiffres distincts ne sont pas donnés pour les endroits non constitués parce que ces derniers ne sont pas officiellement délimités. Il n'est pas toujours possible de dégager le chiffre de leur population de celui du reste du township ou canton, de la municipalité, etc., dont ils font partie.

Les agents recenseurs sont tenus, néanmoins, d'inscrire séparément dans leurs dossiers les ménages de tous les endroits non constitués qui peuvent se trouver dans leur région de dénombrement. Cette méthode n'a pas réussi également dans toutes les régions. Du fait du nombre très élevé de ces endroits au Canada, il est rarement possible de vérifier lorsque l'identité des villages et hameaux distincts n'a pas été établie. L'adresse postale étant parfois confondue avec celle de l'emplacement réel du logement, il est très difficile de constater le nombre exact des personnes à inscrire pour le village ou l'établissement, au lieu de la région avoisinante.

Pour des raisons telles que celles qu'on a déjà signalées, les chiffres de la population donnés dans le tableau qui suit doivent être considérés comme approximatifs. Un renvoi avertit le lecteur lorsque les chiffres distincts de 1941 ne sont pas disponibles. Dans la plupart des cas, il s'agit d'un cas d'un village ou d'un hameau qui comptait alors moins de 50 personnes, mais on ne saurait en être certain.

INTRODUCTION

Earlier bulletins in this series have presented various housing facts from the Census of Housing taken in June, 1951, for provinces, counties, census divisions, census metropolitan areas, and the larger towns and cities. The present bulletin provides a summary of housing statistics for incorporated cities, towns, and villages within the population range of 5,000-9,999.

Since figures derived from the Census of Housing are estimates based on a twenty per cent sample of all dwellings, they are subject to sampling error. In general, the smaller the estimate, the larger is the relative sampling error. For that reason, estimates of less than 100 are replaced throughout the tables by double dashes to indicate that the sampling errors associated with them are relatively large.

The following definitions and explanations apply to terms appearing in the tables of this bulletin:

Dwelling: For census purposes, a dwelling is defined as a structurally separate set of living premises with private entrance from outside the building, or from a common hallway or stairway inside. All occupied dwellings are represented except hotels, large lodging houses, institutions, clubs, camps, and other such collective types of living quarters.

Household: A person or a group of persons occupying one dwelling unit is defined as a "household". Every individual is a member of some household. The number of households will thus be equal to the number of occupied dwellings.

Single detached dwelling: This type of dwelling is commonly called a single house, i.e., a house containing one dwelling unit, and completely separated on all sides from any other building or structure.

Rooms: In determining the number of rooms in a dwelling, only those rooms used or suitable for living purposes, including rooms occupied by servants, lodgers, or members of lodging families, are counted. The following are not counted as rooms: bathrooms, pantries, halls, clothes closets, and rooms used solely for business purposes. Summer kitchens, sun-rooms, rooms in basements or attics are not counted unless they are finished off and suitable for living quarters throughout the year.

Need of major repair: A dwelling is classed in need of major repair if it possesses any one of the following defects: (i) sagging or rotting foundations, indicated by cracked or leaning walls; (ii) faulty roof or chimney; (iii) unsafe outside steps or stairways; (iv) interior badly in need of repair.

Crowded households: For census purposes, a crowded household is defined as one in which the number of persons exceeds the number of rooms contained in the dwelling.

Tenure: A dwelling is classified as owner-occupied if it is lived in by the person who owns it; otherwise it is classified as tenant-occupied, whether or not a specified rent is paid.

Monthly rent: Figures on monthly rent are based on the rent paid or payable for the month of May, 1951.

PREPARED IN THE POPULATION SECTION
OF THE CENSUS DIVISION

INTRODUCTION

Les bulletins antérieurs de la présente série présentaient, pour les provinces, les comtés, les divisions de recensement, les zones métropolitaines de recensement et les grandes villes et cités, diverses caractéristiques de l'habitation constatées lors du recensement du logement, en juin 1951. Le présent bulletin donne une statistique sommaire de l'habitation pour les cités, villes et villages constitués d'une population de 5,000 à 9,999.

Étant donné que les chiffres tirés du recensement du logement sont des estimations basées sur un échantillon de 20 p. 100 de tous les logements, ils demeurent sujets à l'erreur d'échantillonnage. En général, plus l'estimation est petite, plus l'erreur relative d'échantillonnage est grande. Pour cette raison, les estimations de moins de 100 sont remplacées partout dans les tableaux par un tiret double qui indique que les erreurs d'échantillonnage associées à ces estimations sont relativement grandes.

Les définitions et les explications suivantes s'appliquent aux termes et expressions employés dans les tableaux du présent bulletin:

Logement: Pour les besoins du recensement, on définit un logement comme étant une série de pièces d'habitation distincte au point de vue de la structure et qui a son entrée particulière de l'extérieur de la maison ou sur un corridor ou un escalier communs à l'intérieur. Tous les logements occupés sont représentés sauf les hôtels, les grandes maisons de chambres, les institutions, les clubs, les camps et autres genres d'habitations collectives.

Ménage: Une personne ou un groupe de personnes occupant un logement constitue un "ménage". Chaque personne est membre d'un ménage. Le nombre de ménages sera ainsi égal au nombre de logements occupés.

Logement unique-maison seule: Ce genre de logement s'appelle ordinairement une maison à logement unique, i.e., une maison contenant une unité de logement complètement séparée sur toutes les faces de tout autre édifice ou toute autre construction.

Pièces: Pour déterminer le nombre de pièces dans un logement, seules les pièces habitées ou habitables comme pièces d'habitation, y compris les chambres des serviteurs, des chambreurs ou des membres de familles chambreuses sont comptées. Les pièces qui suivent ne comptent pas comme pièces d'habitation: salles de bain, garde-manger, corridors, placards et pièces affectées uniquement à des fins commerciales. Les cuisines d'été, les solariums, les pièces du soubassement et du grenier ne comptent que s'ils sont finis et habitables durant toute l'année.

Besoin de réparations importantes: Un logement est classé comme ayant besoin de réparations importantes s'il présente l'une quelconque des déficiences suivantes: (i) Fondations fléchissantes ou pourrissantes, qui peuvent être décelées par des murs lézardés ou penchés; (ii) Toit ou cheminée défectueux; (iii) Marches ou escaliers extérieurs dangereux; (iv) Intérieur ayant grandement besoin de réparations.

Logements encombrés: Pour les besoins du recensement, un logement encombré est un logement où le nombre de personnes est plus élevé que le nombre de pièces contenues dans le logement.

Mode d'occupation: Un logement est classé comme étant habité par son propriétaire si celui-ci l'habite; autrement, il est classé "occupé par un locataire", qu'un loyer déterminé soit payé ou non.

Loyer mensuel: Les chiffres relatifs au loyer mensuel sont basés sur le loyer payé ou à payer pour le mois de mai, 1951.
